

Version Report: AriExpress

Version 2

- Fixed from Version1:
 - Fixed all running tests.
 - Fixed purchaseCart functionality – external services are singletons.
 - Added Responses for service methods.
 - Added logger in service methods.
 - Fixed all tests from previous Version.
 - Fixed many malicious implementations.
 - Added concurrency.
- Version2 Adds:
 - Presentation Layer: 2 use cases as requested, models, and migrations.
 - Initial Django system messages passing.
 - Json methods to pass specific data to the presentation layer.
 - Filled new test signatures for new methods.
 - Permissions
 - Discounts policies
 - Updated diagram
 - Updated terms

What is left to do:

- Concurrency Tests.
- Fill the tests according to signature scenarios and finish fixing existing ones.
- Finish use cases.
- Finish integration tests.
- Continue developing Django
